Problem Solving

Languages

Java, C++, C#

MySQL, JQuery

HTML5, CSS3, Javascript, PHP

Energetic computer science professional with proven skills in Java and app design. Seeking to work hard and smart as an intern at Google. Created two eCommerce sites with 100% client satisfaction. Updated a mobile website with 50,000 monthly users 3 days ahead of deadline.

Experience

2015 -

2019

Freelance Computer Science Projects

Various

- Created eCommerce site that sells designer switchplates. Used PHP, MySQL, HTML, CSS, and JavaScript. Includes customer database.
- Created CAD project that makes 3D-printed action figures using Facebook profile photos. Project was cited in the Deelip blog with color photos.
- Updated mobile site for NutritionMonkeyShines.com to meet Google's mobile first guidelines. All pages passed with an average of 2 errors each.
- GitHub project: "moby." Added memory.kernelTCP support for Linux. Also added device support for Windows and fixed log output format.

2014 -

2019

Computer Science Projects in Past Jobs

Various

- Debugged online store for local sporting goods shop.
- Performed upgrades to update eCommerce site to latest Apache distro.
- Created customer ordering site for local florist shop.
- Sourced new hardware for florist's computer system. Saved them 45%.

Education

2014 -

2018

B.S. in Computer Science, John Carroll University

- Pursued a passion for programming and software development classes.
- Member, Student Chapter, Association for Computing Machinery (ACM)
- Received Robert B. Carver Senior Award for computer science excellence.
- My podcast on mobile computing was downloaded 1,800 times.

Conferences

2018

DeveloperWeek

2017

Devnexus

Award

2018

2nd Place, Coderbyte coding challenge.

Additional Activities

- Led a coding challenge at HackOHIO 2018.
- President, Way2Go gaming club. Raised attendance 120%.
- See my programming portfolio at helenizbasa.com.
